the Insurgents. DSANTIAGO DE CUBA, June 11, via KEY WEST, June 22.-Since your correspondent's last communication the only important events that have occurred were the burning of the summer resort Cuabita, and the publication of a proclamation by the generalin-chief.

Cuabita, three miles from this city, and the first station on the American railroad, is a beautiful country place with balmy air, excellent spring water and a good river, where many families have built handsome and costly summer residences.

On Saturday night, the 10th inst., about 10 o'clock, it was visited by a band of forty rebels, who set fire to the village and killed five residents and wounded two. The fire destroyed as many as twenty-two houses, leaving only ten or twelve, which were saved presumably by chance. The flames could be distinctly seen from

this city. When the Guerrilla, which was a short distance away, arrived, the rebels had already left.

The proclamation (a copy of which together with the second proclamation s given below) which was issued by Gen. Salcedo on Sunday afternoon, the 9th inst., caused the greatest excitement among the inhabitants.

As soon as it became known, two or three of the consuls visited the general for an explanation, and the answer was that it was not intended for this city and that there was a mistake in the printing. It is thought that the visit of the consuls caused the general to change his plan, as he gave orders to recall the proclamation, and issued another somewhat modifying the first orders.

It is said here that the first was sent out at the instigation of the members of the Spanish club, the members of which were angry at the killing of the Spaniards in Cuabita. Gen. Salcedo is is constantly in the club house and the members have great influence over him. Everyone here believes that even the second proclamation will be the source of many abuses on the part of the Spaniards towards the unfortunate country people, as they will be the victims of many personal revenges. It is believed that the era of blood-

shed will soon begin, the same as in the last war. In fact, the more excitable Spaniards declare that such will be the case. The first proclamation declared Don Juan Salcedo Y Mantille de Los Rios

general-in-chief of the first district of operations, and says: "Let it be known that the security take measures of extraordinary rigor justified by the brutal murders committed last night in the village of Cuabita. And in order that my services for the campaign may have all the extention necessary and may be felt with due force any inhabitant of this capital, the towns or villages who may be out of his residence from sunset to sunrise will run the risk of losing his ife, as I have ordered all my troops to shoot at sight without calling on anyone to halt, by this means avoiding all false identification.

"Be it known to all faithful and eaceful inhabitants that this indis ensable measure is taken to terminate he confusion in which we live, that is increased by the darkness of night, which is the protectress of crimes and

engeance.' The second proclamation modifies the first by reading:

"Any inhabitant of this capital, the towns or villages, who may leave his residence, going to the open country, mon to \$1.15, the Wire Nail associafrom sunset to sunrise, beginning on | tion puts up the price to \$1.50 per keg, the 12th inst., will run the risk of losing his life, as I have ordered all my price to \$24. MURDER AND SUICIDE,

Discharged Railroad Agent Kills His Father-in-Law and Himself. PHILMONT, N. Y., June 22. - A horri-

ble case of suicide and murder occurred here at 10:15 o'clock yesterday forenoon, of which Harry Kroose and George Jacobi are the victims. Kroose was the agent for the Harlem road here, having filled the position for the last twenty-three years. Jacobi was his father-in-law, and acted as assistant agent. Kroose was about 43 years of age and Jacobi 62. Kroose killed Jacobi by shooting him twice in the back of the head, and then killed himself by firing a bullet into his own head. The motive for the crime is a

mystery, as both were on the friendliest terms. The shooting occurred only a few moments before a passenger train was due. When the train arrived the conductor and trainmen found the bodies,

both having died instantly. Kroose shot Jacobi in the back of the head as the latter was seated at the desk writing. Kroose had been discharged and the relief agent was on the train that arrived shortly after the tragedy occurred, to relieve him. There is said to be no shortage in his accounts, but that he had become careless in doing business. Kroose eaves a wife and four children, one being a married woman. The other children are aged 18, 12 and 8 respectively.
